OBJECTIVE

I am a very detail-oriented person who always tries to strive for excellence. Seeking a long-term opportunity which will allow me to utilize my skill set and grow professionally along the way. I will bring a strong work ethic and enthusiasm with me to any organization. Excel within a team environment while working well with others and bringing great ideas to the table. Successful in building working relationships within the organization as well as clients.

| • ASP. Net MVC | • JavaScript | • GitHub/ Git |
| • SQL | • JSON | • jQuery |
| • C# | • Object-Oriented Design | • *Java |
| • Test Driven Development | • Bootstrap | • *C++ |

PROJECTS

DevWorks - A short term contracting site for developers.

Technologies Used: ASP. Net Core, Identity, SQL, C#, LINQ, JavaScript, HTML, Google Auth. API, Google Gmail API.

Features:

- When a developer creates an account, they specify their abilities. Based on their abilities they receive a filtered home page that goes in order from contracts they match most to least.
- When an employer creates a listing, they can view recommended developers that shows them developers that have the abilities they asked for in the listing. The developers are also ordered by their rating.
- When an employer hires a developer, DevWorks will send an email using Gmail API.

What'sCookin' - A social website for cooks and their recipes.

Technologies Used: ASP. Net Core, Identity, SQL, C#, LINQ, JavaScript, HTML, CSS, Google Auth. API.

Features:

- Default page displays 6 random recipes from which you can save, rate and follow the cook who made it.
- Added the Repository Design Pattern to add a layer of abstraction between the data and the code.
- You can perform CRUD operations on all your own recipes and search the database for recipes by title.

Movie Library- A ASP. Net Rest API built from scratch to save movies.

Technologies Used: ASP.net Core, SQL, C#, LINQ, JavaScript, HTML, CSS.

Features:

- Added a dynamic search function using jQuery that updates as you type.
- Used jQuery to access data from API. Also allow user to add their own movie to the database with JSON post.

EXPERIENCE

Whiskey Cake— *Multiple Positions*

May 2019 - September 2020

Worked as a team to provide guests with great service.

Cracker barrel— *Server*

September 2018 - May 2019

Started my understanding of full service to guests.
